

TUITION-FREE MONTESSORI EDUCATION

Creative Montessori Academy, authorized by Wayne RESA in January 2001, provides all children with the opportunities and resources to achieve academic success. Here, your child will receive the personalized attention and well-rounded academic experience, one that's aligned with the Michigan Curriculum Framework, in a nurturing, productive environment structured to successfully transition them into some of the top schools and colleges all over the world.

.....► The beauty of our school is that all parents who want the best education option for their child can afford it. Creative Montessori Academy is tuition-free in grades K-8. For our truly young minds, we offer a tuition-based preschool program.

AN EDUCATION FOR LIFE

Making decisions regarding your child's education is one of the most important responsibilities you have as a parent. The years between birth and age 12 are the most critical period of development for forming intelligence and social characteristics.

Take some time to reflect, ask questions about your child's education, and explore your options. Come meet with us, visit our school, and learn more about our programs.

For our truly young minds, we offer a tuition-based preschool program.

We invite you to join the Montessori movement. **Enroll your child today!**

We strive to teach children not just the right answer but how to ask the right questions.

Tuition-Free Montessori Education
Tuition Based Pre-School

What's so cool about Middle School?

Smaller class sizes

Individual Learning Plans

Competitive Sports Teams

National Junior Honor Society

High Achievement with Academic Success

Home/Family Feel

Montessori Method

Band & Choir

Extra Curricular Activities:

Green Team, Robotics, Newspaper, Library Club, Interact Club, Yearbook

Competitive Sports Teams:

Girls/Boys Basketball, Cross Country, Run Club, Girls/Boys Soccer, Flag Football, Volleyball

The Montessori Middle School Program is beneficial because

- Meets the adolescent where they are
- Builds on the strengths of the developmental period
- Readies the student for the next experience
- Capitalizes on creative problem solving skills
- Students collaborate effectively
- Students learn to organize and manage the demands of school
- Equips students for the rigor of High School

Half of the curriculum is delivered in a small group setting with the expectation of collaboration. Students learn to practice acceptance, equity, sharing responsibility and accountability. Most students find group work productive and enter High School more skilled and patient in working with others.

Montessori students are encouraged to discover and to choose learning experiences that demonstrate and complement both mind and heart as equally important, and that one is empty without the other.

CMA offers electives that contribute to the growth of each and every student.

THESE INCLUDE:

Art: Art is taught using the Masters of Art with The Elements and Principles of Design.

Music: Through music students can develop critical cognitive function.

Physical Education: Physical activity and awareness is a critical element used in this method.

Spanish: Students are introduced to basic grammar, and language skills.

STEM: Students are introduced to coding, engineering, project-based learning and more.

"It's just, good fun being the one to see the thrill in their eyes as they recognize their amazing (toe tapping) accomplishments."

Mike Begian, Director of Music

MONTESSORI WORKS

The Montessori approach to education is grounded in the belief that children have a dynamic inner desire to explore and learn about their environment. All children carry within themselves the person they will become. Developing their physical, intellectual, and spiritual potential to the fullest requires freedom – freedom achieved through order and self-discipline. A prepared and stimulating environment allows children to learn at their own pace, according to their own capabilities in a non-competitive atmosphere.

▶ **Montessori-educated children** generally actively seek knowledge, know where and how to look for information. They tend to approach learning by questioning, analyzing, comprehending, and discussing topics, rather than just memorizing or completing assignments.

BEYOND THE BASICS

Creative Montessori Academy is more than just a school—it's a family. Throughout the year, we provide several opportunities for involvement beyond the day-to-day such as:

- Band & choir
- 7th & 8th grade sports
- Field trips
- Family Fun Nights
- Coffee with the Headmaster
- Tutoring programs
- Summer camp
- **And so much more!**
